-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 March 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 9-12, 14-34 and 39-42 is/are pending in the application.
- 4a) Of the above claim(s) 20-22, 29 and 34 is/are withdrawn from consideration.
- 5) ☒ Claim(s) 9-12 and 14-19 is/are allowed.
- 6) ☒ Claim(s) 23-28, 30-33, 39, 41 and 42 is/are rejected.
- 7) ☒ Claim(s) 40 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on 3/17/05 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Pats. 6,669,700 and 6,152,927 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 23-27, 30-32, 39 and 41 are rejected under 35 U.S.C. 102(b) as being anticipated by Tornier (U.S. Pat. No. 4,488,543). Figs. 1-3 of Tornier show a bone fixation system having all the limitations as recited in the above listed claims, including: a curved plate 2; a first opening 6 left; a second opening 6 right (for the purpose of interpretation of the reference and this action, consider in Fig. 1 that the opening in the upper left corner of the plate will be designated "6 left," and the opening in the upper right corner of the plate will be designated "6 right."); a first fastener 3 having a first shank perimeter (tapered portion 3a being considered a portion of the shank) substantially corresponding to the first opening 6 left perimeter, and is positionable at a

Art Unit: 3731

fixed angle relative to the bottom surface of the plate; a second fastener 4 (clearly seen as having a smaller shank diameter than fasteners 3) with a second shank perimeter substantially smaller than the second opening 6 right, and is inherently capable of being positioned or secured (i.e. "positionable" or "securable" as broadly recited) in the second opening 6 right, and at a plurality of angles relative to the bottom surface of the plate; and a locking assembly (9, 11).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 28, 33 and 42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tornier. Tornier does not specifically disclose a fusion member holdable in a position by the plate. However, it is a well established practice in the art of orthopedic surgery to insert a fusion member (or substance, such as bone cement) at a fracture site or, in the case of vertebral fusion, in the disk space(s) between two or more vertebrae that are to be fused, and then cover the fusion member with a fixation plate in order to hold the underlying bones and fusion member in intimate contact with one another to promote a successful fusion. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the Tornier plate in combination with a fusion member, for the reasons discussed above.

Response to Arguments

Applicant's arguments filed 3/17/05 have been fully considered but they are not persuasive. The key issue appears to be whether or not, with regard to Tornier, the second fastener 4 is "positionable" within the second opening 6 right. The claim terminology "*positionable*" does not require any positive structural relationship between the second fastener and the second opening. Therefore, since a fastener 4 is clearly smaller in diameter than the diameter of any opening 6, the fastener is structurally

capable of passing through the opening, and is therefore "positionable" in the opening as broadly recited in the claims.

Allowable Subject Matter

Claims 9-12 and 14-19 are allowed.

Claim 40 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

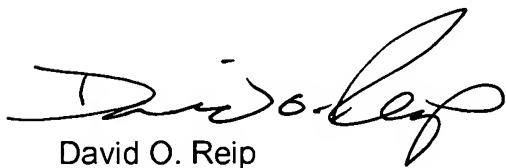

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
